

The government-cloud *service desk* & security platform.

A purpose-built, **ServiceNow-class** platform for IT service management and security operations — born in the FedRAMP / CUI boundary, serving many government customers from **one system of record**.

AZURE GOVERNMENT

MULTI-TENANT MSP

Azure Gov

IN-BOUNDARY FOR CUI WORKLOADS

Multi-tenant

MANY CUSTOMERS, STRICT ISOLATION

Audit-ready

EVIDENCE MAPPED TO NIST / FEDRAMP

CAPABILITIES AT A GLANCE

IT Service Management

Ticketing with priorities & SLAs, agent queues, on-call paging, and full **incident, change & problem management**.

Security Posture & Compliance

Continuous monitoring, posture scoring, asset inventory, and an **immutable audit trail** mapped to NIST 800-53.

Multi-Tenant Trust

Isolation **enforced at the database**, least-privilege roles, just-in-time elevation, and delegated org-scoped admin.

Self-Service & Automation

Service catalog, guided request forms, approval workflows, a knowledge base, and **“Ask Anchor”** to deflect routine work.

Microsoft 365 & Cloud

Native M365 (GCC) email-to-ticket, Entra ID SSO, and Teams — plus **Azure Gov & AWS GovCloud** catalog requests.

Insight & Reporting

Executive & operational dashboards, SLA and workload analytics, and self-service reporting on **service health**.

WHY IT MATTERS FOR SBS

- ✓ **Lower cost, full control** — ServiceNow-class capability without licensing or lock-in.
- ✓ **One system of record** — desk + security together; fewer tools, cleaner data.
- ✓ **Meets users where they are** — M365, email & SSO; minimal change management.
- ✓ **Compliance by design** — audit evidence is a by-product of operations, not a fire drill.
- ✓ **Scales as an MSP** — onboard each customer as an isolated tenant.
- ✓ **Faster resolution** — automation & self-service speed fulfillment.
